ACCT: 9946
PROJ: DESILVA.HAYWARD

FROM: Richard A. Kagel, Ph.D.
Laboratory Director

SUBJECT: LABORATORY RESULTS FOR YOUR PROJECT DESILVA.HAYWARD

Enclosed please find K Prime's laboratory reports for the following samples:

SAMPLE ID	TYPE	DATE	KPI LAB #
W-24-3	SOIL	03/02/06	54222
W-25-3	SOIL	03/02/06	54226
W-26-1	SOIL	03/02/06	54227
W-26-3	SOIL	03/02/06	54228
W-28-3	SOIL	03/02/06	54236

The above listed sample group was received on 03/03/06 and tested as requested on the chain of custody document.

Please call me if you have any questions or need further information.
Thank you for this opportunity to be of service.

Analytical Sciences

March 10, 2006

K Prime, Inc.
3821 Westwind Blvd.
Santa Rosa, CA 95403
ATTN: Carla Kagel

Dear Carla,

Enclosed you will find the final report 6030901 for your 9948 project. As required by the California Department of Health Services, the letterhead copy of the report for work performed by the subcontracted laboratory is included. An invoice for this work is enclosed.

Should you or your client have any questions regarding this report please contact me at your convenience. We appreciate you selecting Analytical Sciences for this work and look forward to serving your analytical chemistry needs on projects in the future.

Sincerely,

Analytical Sciences

Mark A. Valentini

LAB SAMPLE NUMBER	SAMPLE ID	AREA/TYPE of SAMPLE	SAND EQUIVALENT %	FINES TOTAL %	RATE of INFILTRATION cm/sec	TENSIOMETRY kPa	SOLUTE DIFFUSIVITY sqcm/sec	HYDRAULIC CONDUCTIVITY cm/sec

COMMENTS

Samples were remolded and compacted to ninety, although the first sample was in the shape of a core and needed only minor work (one end had split open). In any case, all three samples have densities greater than 100 lbs/cuft, but notice there is a progression in density values. This is likely the result of not only textural differences, but also the result of gravel content. The first sample appeared to have virtually none, while the second seemed to have only a minor amount of fine gravel, and the third had a significant amount including some rocks. Those rocks made a significant difference in density. This sample also seemed to have more sand than the other two, and thus has a coarser texture overall.

NOTES: Samples are prepared according to appropriate methods as required, requested, or found in one of the following references: American Society for Testing and Materials (ASTM), and/or Methods of Soil Analysis (ASA/SSSA), c 1982, 2nd ed., or other appropriate acceptable methodologies (eg. AASHTO, USGS, EPA, USDA, etc.): density - ASTM D 2937; Specific Gravity - ASTM D 854; Capillary Moisture - ASTM D 3152/D 2325; Hydraulic Conductivity - ASTM D 5084; Sand Equivalent - ASTM D 2419; Fines Total - ASTM D 422; Rod penetration measures - Methods of Soil Analysis
